

Dear Magnetite

Firstly I would like to thank you for installing Magnetite windows to our offices in the city, wow what a difference it makes. The reduction of street noise is amazing and a real help for our staff.

We had Magnetite double glazing installed over three floors in our office building in Adelaide city, which equates to 49 windows. The results have been outstanding, with a saving of almost 20% off our electricity bill last quarter as well as a massive reduction of street noise in the office, which has improved the working conditions for employees who were constantly interrupted by excessive noise. I would highly recommend their service as they were punctual, cleaned up after they installed and were incredibly helpful throughout the whole process.

I would highly recommend your product to anyone looking at saving money on electricity and who wants to reduce incoming noise.

Thanks once again for your great service and unique product.
